

LIST YOUR PROPERTY IN CYPRUS

Step 1: Personal details

Fill in the empty boxes with all personal detail requested.

Once you have completed all boxes and you have typed-out the verification code click "Next Step".

Step 2: Property details

Fill the required boxes below to offer more precise information about your property in Cyprus. Some are to be filled (typed-out) manually, whilst others are to be selected from the drop down list.

Please note, you DO NOT have to fill in the box "Land&Plot Zone" unless your listing refers to a plot of land. If so, this will be found in your land's Title Deed.

Write a brief description of your property. This is essential as you will be providing your property's specifications and will show potential tenants/buyers the overall description and state of your property.

Remember, this is your opportunity to literally "sell" your property, so be dynamic and descriptive, yet also clear and concise. "Accurate information helps in the right decision making!"

ADVICE: You can take examples from our already listed properties! Small description and then bullet point form of the property's specifications.

Once you have finished, click "Next Step".

Step 3: Upload Property Photos and Video

Upload Property Photos

In this section you are asked to upload some photos of your property. The maximum number of images you can upload is 5 (max size per image 4.5 MB).*

Choose photos that give the best overall picture of your property!

Do not upload any photos of the property's surrounding area.

TIP: An image tells a thousand words, so take time and effort with your images:

- **Make sure property photos are clear and have good lighting**
- **SLR cameras with wide lens are ideal for taking a photo of an entire room**
- **Make sure your space is clear of clutter and looks clean before taking the photo**
- **Take many photos and then go through them and choose which are best to upload**

* In case you have some more photos that you wish to upload, please send these to info@primestar-estates.com, with your personal details (that you have filled in Step 1) and we'll arrange to upload them for you.

Upload Property Videos

This option is mainly for computer Gurus. Avoid this step if you do not know how to do it or if you do not have a video of your property.

You can upload a video of your property by uploading to Youtube (note, this can also be uploaded privately so it is not available to the general Youtube public) and then adding (or known as embedding) the YouTube link in the last box.

Again don't worry about this, as it is **NOT ESSENTIAL!**

Once you have chosen the photos to upload and maybe a video, click "Upload Property".

AND THAT'S IT!

Your request will be reviewed by one of our agents and then listed in our website!

Thank you.
